Meeting of the Democratic and Johnson Contmittee. From The Albany Evening Journal of yesterday.

From The Athany Evening Jearnal of yesterdey.

The Delayan House has been the scene of considerable excitement to day. The two committees that have assumed the guardianship and control of the interests of the Bobos met in selemn conclave to devise wave and means for transferring this State into the hands of their alies. Several grominant Democratic politicians from different parts of the State were present.

Those who pride themselves on being par excellence the Conservative Unionists of the country were represented, and they had a programme of operations. They insisted that two conventions should be called, one to consist of the Democracy and the other of the Johnson Republicans. This list convection, it was claimed, should nominate the ticket, and the other should raify it.

the other of the Johnson Republicans. This last convention, it was claimed, should nominate the ticket, and the other should raify it.

But if the not take long for them to learn that a considerable pertion of the Democracy considered the proposition very modest—it being nothing less than a proposal that a party which is to farnish at least 50 per cent of the voters, in addition to surrendering all the Federal offices, should yield one-half of the ticket outright, and also the right to select the seminees that should come from their own ranks.

On the other hand, the Conservatives said that unless their is not operations should be followed, they could not secure a corporal's guard from the Union ranks in any district of the State, which is true enough, in either event.

The Democratic Committee met and set aside the Conservative plan. A force fight was made against holding the Convestion in this city, but did not avail. The Convention will be held here on the 12th of September.

A call was framed, for two delegates from each Assembly district, all supporters of Johnson's policy, to anise in the schole of delegates, and to this call the signatures of the Domocratic Committee were attached. It was then sent to the either Committee for approval.

In the mean time, the Conservatives had organized by the electron of the Hon. Rebert H. Prayn as Chairman, and the Hon. Albert Andras as Secretary, and were awaiting the terms of transfer to be proposed by the other side. The cult was decided and marked. Alterations were suggested, and vere accompanied with the declaration that if not accoded to separate Conventions must be acided.

Both Committee's then adjourned for dinner. How the variance will be adjusted romeans to be seen. It now seems probatio that two Conventions will be held.

the Board of Health, Dr. Elisha Harris, Registrar of Records, writes thus.

The returns of mortality in our two cities for the week ending AugIls, afford convincing evidence that the public health in both is rapidly returning to a constant standard. In the unides of all the pathic building of the increased mortality, and the turking of one of its special courses in past nine weeks, we have seen such proofs that all this can commend to limited areas, and to still more inside that this very waste of life has become the norans of showing town and where we must live to see and protect the public health. Obolera in New-York.

The cholera statistics of this city show a gradual droline in the disease. The greatest number of deaths in one reek took place in that ending on the 11th instant, when 250 were recorded from this cause. During the week previous to that date, the number was 239. During last week, 145. The per centage of deaths will not be known until the final report of the Board of Health, which will not be issued before December next. From the days we have, we feel assured that while the sanitary regulations that have been so rigorously

cember next. From the data we have, we feel assured that while the sanitary regulations that have been so rigoromiy enforced ever since the organization of the Metropolitan Board of Health, in March last, have prevented a pestitence, the recoveries have not exceeded the average 50 per centum noticed in previous epidemics. This, however, only proves the value of bygienic measures over curative agencies in treating the disease under the present state of knowledge.

From the 20th of July to the 20th of August inclusive, 33 patients were treated in the Red House Hospital, of whom 19 died, 9 were discharged, while 5 remained at the latter date. This shows a mortailty of 57.5 per contum nearly. In the Battery Barracks Hospital, from July 26 to August 18 inclusive, 26 patients were treated, of whom 58 died and 27 were discharged, leaving 11 under treatment at the date of last report. This gives a mortality of little more than 30.5 per centum. The per centum of deaths in private practice will perhaps never be accurately known, for the reason that correct returns of cases have not been made. We have sufficient proof, however, that the mortality in hospitals is very great undethat prevention is vasify preferable to care. The time will come when obsoira hospitals, even in the midst of an epidemic, will be mikrown, and when the prophecy of Dr. William Budd will be realized, namely, that chever will be come as harmless, through prophylactic treatment, as smallper has been made by the discovery of Dr. Jenser. The experience of New York and Rocoklyn during the current season certainly gives cause for hope that the disease which within 50 years has destroyed 50,000,000 lives, may be shern of most of its terrors and much of its fatalky by the simple acts of dispersing crowds and what Statistics for the 24 hours ending at 2 p. m. years, lay more than twice as many as took place during the previous as we keen seed to the decay of the prophylactic streamers of the decay of the decay of the server of the prophylactic streamers of t

The trade between Liverpool and New-York has assumed attch and proportions that in addition to the numerous fleet of steamers owned by the Cunnard Company, the Imman Company and the National Company, plying almost daily, and some days more than one being dispatched, we now have to notice an addition to the commercial facilities offered to the trading world by the firm of Gaion & Company, who have organized a steam traffic in vessels of the class, large capacity, and accommedation for first and second-class passengers, and satisfactory speed. The first vessel, the Manhattao, salied yester day with a fall carge and campleanent of passengers, and the remaining ships of the line, which are far advanced, will be falled to the beach as less as attrices among the workmen will allow.

centhest. last evening. The call was addressed to the Central Committee of the United Service Society, but the meeting seemed composed chiefly of these not members of that association, and only the energetic protest of Col. Burke prevented the initiation of a movement looking to the organization of a newsociety of soldiers and salitors who indorse the Johnson polety—a movement which would have completely ignored the existence of the United Service Society.

The object of the meeting last evening, as stated in the call, was to make preparations for a mass meeting of the soldiers and sailors who can be induced to affiliate with the Democratic party and support "my policy." Gen. Hobert Ward was chosen Chairman. After considerable discussion it was finally resolved to leave all arrangements for the proposed mass meeting to a Committee composed of one from each Assembly and Senatorial District in the City and County of New York, said Committee to be appointed by the Chairman.

On motion, the veterans of Brooklyn were invited to unite in the meeting by nominating as additional members of the committee one from each of the Brooklyn were invited to unite in the meeting by nominating as additional members of the committee one from each of the Brooklyn were invited to unite in the meeting by nominating as additional members of the committee one from each of the Brooklyn were invited to unite in the meeting by nominating as additional members of the committee one from each of the soldients with the care advisable in one evening, whereupon, on motion, it was resolved to adjourn the meeting until lins, (Wednegder), versing, when the suppose of the committee will be announced. THE EXTRA TRIBUNE for the POLITICAL

A political struggle, rarely surpassed in importance or intensity, has

been precipitated on the country by the treachery of Andrew Johnson and some of his official or personal adherents to the great and

hate and curse as responsible for the most unexpected overthrow of their derling "Confederacy."

The recent wholesale answerse at Memphia and New-Orleans were

but conspicuous manifestations of the spirit now campant in the South, whereof the pro-Robel triump's in Kentucky is a more recent

example. The soldiers of Lee, Beautegard, Johnston and Hood are now the dominant power from the Potomec to the Rio Grande; they elect each other to office in preference even to stay-at-home. Robels:
